## ABOUT US

The “Bezpeka & Zakhyst” Security Group has been carrying out professional services for over 10 years and has an impeccable reputation as a reliable partner. We are ready for the most demanding work and provide a full range of security services licensed by the Ministry of Internal Affairs of Ukraine and relevant for any property. All employees of our company certified experts that have passed thorough physical and health testing, hard- and soft skills development, and advanced training in property protection.

“Bezpeka & Zakhyst” is competence, responsibility and reliability. We protect shopping malls, shopping centers, business centers, residential complexes, industrial property, construction sites, and catering establishments. Also, we provide an executive protection and cargo escort.

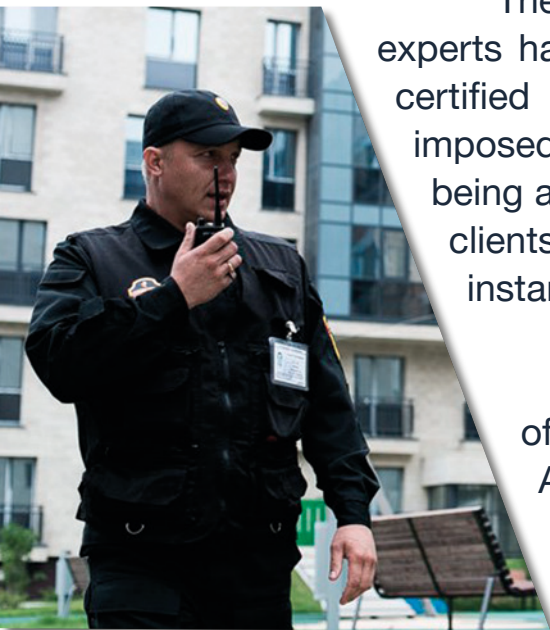

## WHY US

The “Bezpeka & Zakhyst” Security Group is a team of true experts having service in the army and law enforcement agencies, certified at recurrent trainings, being aware of and fulfilling the imposed mission while having the most innovative equipment and being always ready to perform protection and safety tasks for our clients. Due to our vehicle fleet our agents always provide an instant response to incoming calls.

The administrative and managerial staff consists of officers of the Armed Forces of Ukraine, the Ministry of Internal Affairs, and the Security Service of Ukraine with extensive experience.

Our long-term experience in protection service makes us a top-security provider for any type of property and any specific request of a client.

## OUR SERVICES

We combine human expertise and innovative protection technology for the most- and cost-effective solution. We offer our clients a variety of security services:

1. Property monitoring and inspection.
2. Protection of community and industrial estate
3. Stationary security posts and patrolling
4. Armoured vehicles for rent (with a driver) for transportation of exclusive items or goods of solid value.
5. Executive protection for the principal (including children)
6. Planning and implementation of security measures for residential complexes and suburban community estate.
7. Protection of private houses.
8. Anti-seizure assistance in case of illegal takeovers

Be sure that your most valuable is secured and safe while entrusting your protection to the “Bezpeka & Zakhyst” Security Group. We guarantee confidential service, an individual approach and effective solutions to security issues for each client.

## SPECIFICS OF ACCOMPANYING THE CARGOES

The end-to-end logistics is the most important link in a seller-buyer chain, as the most profits the domestic entrepreneurs receive are from sales. Such accidents as breakdowns, unplanned downtime or robbery are common when speaking about cargo logistics. Hiring experts able to provide solid cargo accompanying service due to their extensive knowledge in the field is to ensure your cargo escort and prevent threats or losses.

## CARGO PROTECTION AND ESCORT MANAGEMENT

Cargo escorting and protection consists of a set of strategies developed individually for a specific transportation. They are aimed at preventing the theft of inventory items or their damage. Regardless of how specific and complex is the route the cargo is expected to follow, the task of security is to ensure its safe and timely arrival at its final destination. In order to do that we:

1. Develop the map of main and alternative routes
2. Prepare escape routes from various landmarks in case of an emergency
3. Provide cooperation of all security groups involved
4. Develop strategies to ensure discreet cargo transportation
5. Provide equipment, uniform, communication means, vehicles and consulting required.

The “BEZPEKA & ZAKHYST” Security Group considers all required measures and the protocols for each cargo transportation individually:

1. Declared value of the cargo.
2. General characteristics (non-hazardous-hazardous, over-sized-dimensional, packaging).
3. Special requirements for the transportation and storage of goods and materials.
4. Crimes' record on the route
5. Distance, borders to pass, terrain and quality of the roadway.

Only comprehensive approach ensures effective protective measures. We pay significant attention to the escort and protection of goods transported by railways due to the limited choice of routes and lack of alternative emergency strategies consequently.
