SPECIFICS OF EXECUTIVE PROTECTION

According to statistics, about 5000 people missing annually in Ukraine. About 1500 of them are children. Some is not found. Never. Therefore, in a modern world, executive protection is not only in demand among celebrities, politicians and other executives, but also among those seeking for safety and security of their loved ones.

Executive protection is a set of strategies and measures developed and implemented to ensure the principal's protection in order to prevent or eliminate any direct threat to his life or health.

EXECUTIVE PROTECTION MANAGEMENT

The executive guard is the main link between the principal and the rest of the team. It has a primary responsibility to protect the principal. The main task of such teamwork is not just to protect the client from the threat existing, but to encompass proactive intelligence to identify both probable and possible threats from persons and groups of interest in the future. Single "bodyguard" would not cope with that. The high skills of each in the team allow discreet but prompt performance, with no inconveniences to the principal and interference into his privacy.

The "BEZPEKA & ZAKHYST" Security Group choose the executive guard according to the needs and requests of the client. All our executive guards are certified specialists who regularly undergo medical examinations, professionals in their field with the required expertise and knowledge.

WHAT DO WE OFFER?

Based on the clients request and his needs, executive protection can be:

1. Open, with an executive guard, having advanced level of training and adhere to the dress code, accompanying a principal

2. Under-cover, both publicly and for the most of the team.

3. Mixed, allowing to provide enhanced protection upon uncovering surveillance of people of interest

The services are provided according to prior approved schedule, hourly or around the clock. The principal is also offered:

1. Monitoring alarms 24/7.

2. Portable alert button with GPS tracker.

3. Smoke, gas and water flooding sensors installation.

4. Research of travel routes in order to develop alternative maps.

5. Access control of visited places.

6. Security escort during the transportation of documents, valuables.

7. Executive security for events, meetings, public speeches.

8. Checking persons in contact with the principal, restricting access if necessary.

9. Protection on foreign trips or in flights

Executive protection for kids are also available. The executive guard accompanies the child to school, on promenades, etc.

Nothing threatens you and your family while we are on duty; the "BEZPEKA & ZAKHYST" Security Group insures that.
