## NATURE OF ILLEGAL TAKEOVERS

Illegal takeover often involves law abuse or forceful actions of “persons of interest” towards a legal entity. In this case, the owner of a business or a property is forced to transfer his ownership rights.

Prevention of illegal takeover hardly possible without extensive expertise in law loopholes, as the measures to commit it varying from causing damages to a competitor to attempt to buy cheap a company’s assets. Illegal takeover has such variables:

1.White, involving corporate blackmail, minority shareholders’ strikes in order to stagnate business processes

2.Grey, involving forced or law abuse action against the property or business owner and usually “behind his back”. They sometimes occur on the basis of fictive court decision violating civil law.

3.Black, involving direct threat to the life of a business owner or his family members in order to force him to commit transfer of his ownership rights a third party.

The scenario is intentional and thoroughly prepared, often involving high officials or executives, therefore only experienced professionals are able to prevent it or eliminate consequences.

## SPECIFICS OF PREVENTIVE STRATEGIES FOR ILLEGAL TAKEOVERS

Raider takeover is the result of neglect of security measures and legal illiteracy. The proven protection strategies and means are:

1.Discreet security systems for employees’ surveillance.

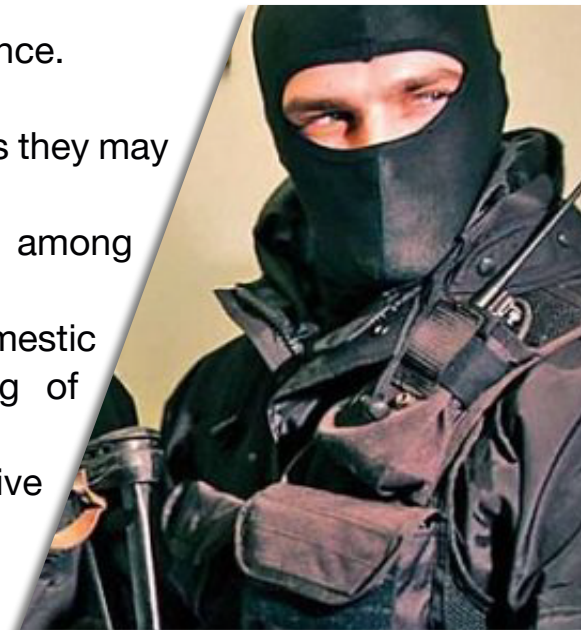

2.Regular audits of constituent documents.

3.Keeping in focus debts of the company or loans, as they may be triggers for encroachments

4.Considering the distribution of shares among shareholders.

5.Developing and monitor a set of domestic anti-espionage measures such as polygraph testing of employees, regular personnel checks, etc.

6.Engaging advanced technologies and executive security.
